SILENI NANO

Our super premium range for everyday drinking. The Sileni NANO range is based on rich, soft and approachable hand-crafted wines.

Vineyards

Tempranillo vines are planted near Valence, in eastern central Spain, where temperatures are cooler at night. The Spanish climate ensures that the vines enjoy optimum sunshine, with very little rain. This results in healthy development of the grapes, which progressively reach maturity and an ideal concentration. The soil is composed of clay, limestone and sand from the great chalky Karst plateaux. The grapes come from vineyards planted between 600 to 900 m in altitude.

Winemaking Notes

Grapes are picked at optimum ripeness. After the grapes are pressed, the free-run juice is settled. The resulting clear juice is racked and then fermented at cool temperatures, to retain fruit flavour.

Tasting Notes

Great aromatic intensity, red fruit and citrus notes, with a hint of floral. On the palate the wine is full of fresh fruit flavour, with a crisp refreshing finish.

Food Match

Ideal as an aperitif or to accompany grilled or barbecued dishes, salads and pizzas.
